## Mnet to provide content for VHA mobile portals

16 April 2010

MNet Group has announced a Master Content Aggregator agreement with Vodafone Hutchison Australia (VHA) which will see the mobile solutions company establish, host, manage, operate, supply and maintain Music, Tones and Games content for Vodafone Hutchison Australia on its various portals including Vodafone Live! and Planet 3.

Mnet's CEO, Horden Wiltshire said "Winning this business is another example of the benefits of the recent merger between Mercury Mobility and m.Net Corporation, and reflects the combined entity's credentials and capabilities in Australasia".

"As an enabler to the expanding mobile Internet industry Mnet is extremely well positioned to take advantage of this growth," said Wiltshire, noting that Mnet customers "are now starting to allocate significant budgets to mobile and we do not see this trend slowing down in the near future."
